RISK DISCLOSURE STATEMENT

REWARD INVESTMENTS & SERVICES LIMITED is registered with the Securities and Exchange Commission and licensed by the Nigerian Exchange Limited (NGX) to carry on securities trading business.

Generally, securities investments are suitable for clients who fully understand and appreciate the risks involved. It is highly speculative, involves a high degree of risk and may result in the loss of the entire investment. Therefore, before deciding to trade equities, and/or other related ancillary or capital market operations, Clients should carefully consider their objectives and risk appetite. The Client should exercise particular care in evaluating the risks involved and must decide whether in the light of the assessed risks, investment is appropriate. Clients should be aware that there are always significant risks involved when investing in securities in the capital market. Many unforeseen events such as new and existing government policies, domestic and international political and economic events, and other events of force majeure (acts of God, war, riot, urban unrest, terrorism, epidemic, pandemic, natural disasters etc.) may cause sharp market and price fluctuations. Clients are encouraged to consider all risks (material and non-material) as well as other qualitative and quantitative risk factors associated with investing in securities which differ across board.

The Client should acknowledge and note the risks listed and accept that all these risks could lead to the loss of some or the entire value of the Client's investments:

A. Risks Associated with Securities Trading

1. Investment Risk

All securities investments risk the loss of capital. Many unforeseeable events, including actions by various government agencies and domestic and international political and economic events and other events of force majeure, such as acts of God, and certain other events beyond reasonable control (e.g. war, riot, urban unrest, terrorism, epidemic, pandemic, natural disasters etc.), may cause sharp market and price fluctuations.

2. Market Liquidity Risk

Some of the listed securities in which the Client may invest, may be traded in very low volumes as such, there is the risk that investments may not be easily liquidated. The prices and values of securities can also be influenced by outside factors such as interest rate changes, price or level of any underlying asset, level of interest rates, foreign exchange rates, volatility and liquidity

The potential for profit or loss from transactions in foreign currency-denominated securities (traded locally or in other jurisdictions) will be affected by fluctuations in foreign exchange rates. Clients or companies that have assets or business operations across national borders are exposed to currency risk that may create unpredictable profits and losses.

4. Execution Risk

These occasions include, amongst other things, a situation where the market conditions are not favorable, the order cannot be matched, the laws and regulations of the Exchange or other competent authorities impose limitations, etc.

5. Commission, Fees, Interest and Other Charges

All regulatory fees, commissions, charges are as approved by the regulatory authorities. The Client should obtain a clear explanation of all commissions, fees, interest and charges, and understand that these charges may affect the Client's net profit (if any) or increase the Client's loss. The Client agrees that he/she will be liable for these charges (as may be amended from time to time).

6. Settlement Risk

Settlement risk may arise as a result of technological issues or glitches within the infrastructure thus resulting to a delay in executing clients' mandates.

G. Risk Relating to the Investor's Own Investment

Each decision by a client to invest in the securities is his/her own independent decision. The firm is not acting as an advisor. Before making a decision to invest, Clients should have confirmed that they have carefully studied and considered all information relating to the status, business, financial condition and operation of the company/entity issuing the securities, including the underlying assets of or other information relating to the securities in which the Clients will invest, and other relevant factors relating to the investment such as political, economic, legal and regulatory conditions, as well as market conditions, demand, supply and price of the underlying goods of the securities.
